The Author

Hey! I'm Hannah Vue,
14 years old and an
upcoming freshmenn
attending Patrick Henry
High School.

The pictures on the right
are pictures of sunsets
that I took.

On the right top coner
you can see a photo of
a sunset that I took on
my back home.

On the bottom right corner
is a picture I took on a road
trip to North Dakota I think
last summer. Lately taking
pictures of sunsets has
become a thing for me. Just
seeing them brings me
comfort.

My experience & Knowlegde

My experience here with Asian Media Access has been good. The assignments that are assigned everyday can let creatvity get the best of us.

My knowlegde of what Asian Media Access is in my opion is to let the youth use the creativity they don't know they have.

The assignments the instructors assign uses a lot of thinking and creatvity. For the work we have I think they want us to be creative when creating postcards on Canva, creating cards on Story bird, making animation on Animaker.

Creating characters on Picrew Asian Media Access can help you unlcock your creativeness. So you would be lucky if you had this as your sumer job.

01.

In week 1, our main topic was Bicultural Healthy Living. I made this postcard based on that with Canva.

02.

220628 BCHL - Hannah V

I made this card based on BCHL on Storybird.

03.

How to Vote

-You can vote on Election Day

- You can vote early

- Vote early in person
- Vote early by mail

-You can vote from 7:00am-8:00pm

-Find your polling location at:

<http://pollfinder.sos.state.mn.us>

In week 2, Voting was our main topic to be talked about. I made a 'How To Vote' postcard with Canva and a comic strip with Canva using Picrew as my characters.

04.

220715 All of Us - Hannah

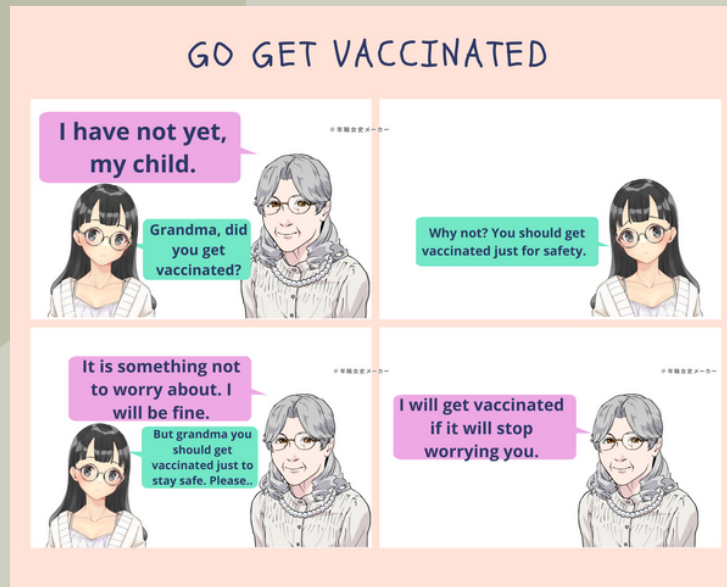

+

05.

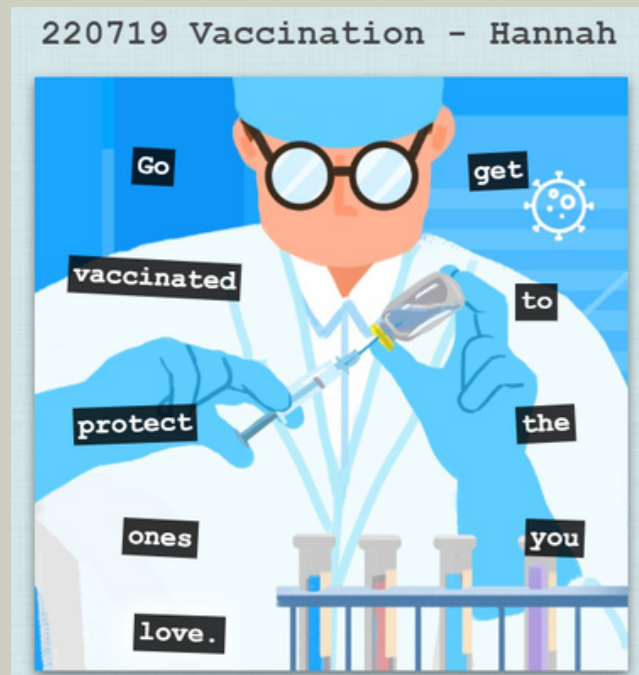

**All of us can help build a
future for health
research and care.**

In week 3, we learned and got to know about All of Us. AoU is a research program in study of precision medicine. These creations are made with Canva and Storybird.

06.

07.

Week 4 was about Vaccinations. I made the comic strip with Canva and my characters are made from Picrew. The card was made on Storybird.

Gambling can increase the risk of a child's physical abuse and medical condition indicative of neglect

You lied to me again! I'm calling for help.

Help for what? I don't need help! And who are you calling?!

Yes, you do need help! I'm calling 1-800-333-HOPE, which is a hotline for problem gambling!

Argh, STOP! Don't call. I'll stop, I promise this time.

If you're going to stop at least let me call them to help you...

Fine. If it helps me not to gamble then go ahead.

Week 5 was about Problem Gambling. We were told to make cards to help prevent problem gambling. Gambling can take a very huge turn in your life. These creations were made with Storybird, Canva, and Picrew.

09.

10.

Week 6 , we focused about Anti-Racism. We all know being rude towards a different race is not nice. Everyone is the same no matter what skin color we are, where we come from, etc. These creations were made with Canva, and Storybird.

As you can see, working with Asian Media Access creates a lot of things. You not only create things, but you also learn a lot of information you've never heard of. Working with AMA brings out the creativity out of you as I said before.
